

Intellishield Ball Return Guarding System

Intellishield improves center efficiency, provides added protection for your guests, and manages the number of bowling balls on your ball return.

- Patent-pending design emits eight infrared light beams across the exit/opening of the ball lift to corresponding receivers
- Automatically shuts off the ball lift if a foreign object enters the opening or the ball rack is full
- Prevents injury by detecting fingers or hands entering the ball lift area
- Prevents overloading of the ball return that can cause balls to fall onto the floor (or a guest's foot)
- Improves center efficiency by automatically restarting when the obstruction or extra ball is removed, with no staff intervention required
- Integrates with the SYNC™ Scoring and Management System, which reports how often the ball lift is shut off
- Compatible with the Frameworx® ball lift and 8.5" bowling balls
